COOLING SYSTEM FOR FUEL CELLS

Examiner: Yuan S.N. 10/019,390 Art Unit: 1745 January 22, 2004

Detailed Action

1. The Applicant's amendment filed on November 25, 2003 was received. Claim 4 was cancelled. Claim 1 was amended.

2. The text of those sections of Title 35, U.S.C. code not included in this action can be found in the prior Office Action issued on September 7, 2003.

Claim Rejections

3. The claim rejections under 35 U.S.C. 102(b) as anticipated by Hsu et al. on claims 1-3,6 are withdrawn because the independent claim 1 has been amended. The claim rejections under 35 U.S.C. 102(b) as anticipated by Kitamura et al. on claims 1-3,6 are withdrawn because the independent claim 1 has been amended.

Reasons for Allowance

4. Claims 1-3,5,6 are allowed. The invention of independent claim 1 recites a device with a fuel cell stack and an external cooling device, wherein supply of a working medium is performed by using a perforated plate in which a size and/or density of holes increases from midline to an edge and the midline runs parallel to a flow direction of the working medium. The closest prior arts of record, Hsu et al. and Kitamura et al., do not teach or suggest the aforementioned features in a perforated plate for use in a fuel cell stack and an external cooling device.
